

STAT Test List

The following laboratory tests are performed STAT when ordered STAT.

Note: Any tests not listed must be discussed with and approved by a pathologist before being performed.

Test Name	Comments
Alkali Denaturation (ADT)	To distinguish fetal RBCs from adult RBCs
Ammonia (blood)	Rule out Reye's Syndrome
Amylase, Serum	
B hydroxybuterate	
Bilirubin, Neonatal, Total and Direct, Serum	
Blood Cultures (collected STAT)	
BUN	
Blood Typing and Crossmatch	
Brain Nautreic Peptide (BNP)	
<i>Clostridium difficile</i> , Toxin	
Calcium, Serum	
Complete blood count and differential tests	
CKMB	
Cord Blood	Rule out hemolytic disease of newborn
Creatinine, Serum	
D-Dimer	
Drugs of Abuse, Random, Urine	
Electrolytes (Na, K, Cl, and/or CO ₂)	
Fibrinogen, Plasma	
Gentamycin	
Glucose, Fasting, Serum	
Glycohemoglobin (A1C)	
Gram Stain	
HCG Beta Subunit-quant	
Hemoglobin, Blood	
Hematocrit, Blood	
HIV-exposure, Rapid	
Lactate	
Osmolality, Serum & Urine	
Phosphorous	Renal failure
Platelet count	

Test Name	Comments
Platelet Count, Blood	
Pregnancy Test (Qual HCG)	
Prothrombin Time (PT), Plasma	
Partial Thromboplastin Time (PTT), Plasma	
Sedimentation Rate, RBC	
Spinal Fluid exam	
Toxicology screen- serum	
Triglycerides, Serum	
Troponin T, Serum	
Uric Acid, Serum	
Urinalysis, Routine, With Microscopy	
Urinalysis, Routine, With Reflex	
Urinalysis, Routine, Without Microscopy	
<p>STAT test turnaround time is defined as 1 hour from time of test ordered. TDM is a 2-hour turnaround time. If testing turnaround time exceeds more than 30 minutes longer than published, notify the critical care area of reason for delay.</p>
