Test Name	Preferred Tube	Also Accept.	Min. Vol (mL)	Preferred tube handling instructions All refrigerated except where noted
Albumin Lvl	Lt Green	Gold	1	Spin within 2 hours
Alk Phos	Lt Green	Gold	1	Spin within 2 hours
ALT	Lt Green	Gold	1	Spin within 2 hours
Ammonia Level	Lavender	N/A	2	***Inpatient hospital draw only. Deliver to lab on ice within 15 min.
Amylase	Lt Green	Gold	1	Spin within 2 hours
AST	Lt Green	Gold	1	Spin within 2 hours
Basic Metabolic Panel	Lt Green	Gold	2	Spin within 2 hours
Bilirubin Total and Direct	Lt Green	Gold	1	Spin within 2 hours **Protect from light
ProBNP (B Natriuretic Peptide)	Lt Green	N/A	2	Spin & aliquot within 2 hrs
Calcium Level	Lt Green	Gold	1	Spin within 2 hours
Carbamazepine Lvl (Tegretol)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
CBC	Lavender	N/A	0.5	Must be received within 6 hours
Cholesterol	Lt Green	Gold	1	Spin within 2 hours *Fasting recommended
CK / CPK	Lt Green	Gold	1	Spin within 2 hours
Complete Metabolic Panel	Lt Green	Gold	2	Spin within 2 hours
Cortisol Level	Lt Green	Gold	2	Spin within 2 hours Indicate draw time
Creatinine Level	Lt Green	Gold	1	Spin within 2 hours
CRP or CRP Ultrasensitive	Lt Green	Gold	1	Spin within 2 hours
Depakote Level (Valproic)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Digoxin Level (Lanoxin)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Dilantin Level (Phenytoin)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Ferritin	Lt Green	Gold	2	Spin within 2 hours
Fibrinogen	Lt Blue	N/A	N/A	Fill tube. Spin within 4 hours, freeze plasma in 2 or 3 aliquot tubes
Folate Level (Folic Acid)	Gold	N/A	1	Spin within 2 hours **Protect from light
Free T4	Lt Green	Gold	1	Spin within 2 hours
FSH	Lt Green	Gold	1	Spin within 2 hours
Gentamicin Level	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Glucose Level	Lt Green	Gold	1	Spin within 1 hr (ONE HOUR)
H. Pylori Ab	Gold	N/A	1	Spin within 2 hours
HDL Cholesterol	Lt Green	Gold	1	Spin within 2 hours *Fasting recommended
Hemoglobin and Hematocrit	Lavender	N/A	0.5	Room Temp (Ambient) Transport
Hepatic Function Panel (Liver)	Lt Green	Gold	2	Spin within 2 hours
Hepatitis Tests or Panel	Gold	N/A	1	Spin within 2 hours
Hemoglobin A1c	Lavender	N/A	0.5	
HIV Test	Gold	N/A	2	Spin within 2 hours Consent needed
Immunoglobulins	Gold	Lt Green	2	Spin within 2 hours
Ionized Calcium (inpatient)	Lt Green	Green	1	Do not spin. Do not open. No ice. Deliver in 30 minutes. Whole Blood
Ionized Calcium (outpatient)	Gold	N/A	2	Spin within 2 hours. Do not expose to air. Do not freeze.
Iron/IBC (% trans saturation)	Lt Green	Gold	3	Spin within 1 hr (ONE HOUR)
Lead Level	Tan	N/A	2	Do NOT Spin
Lipase	Lt Green	Gold	1	Spin within 2 hours
Lipid Panel	Lt Green	Gold	2	Spin within 2 hours *Fasting recommended
Lithium Level	Gold	Red	1	Indicate last dose
Liver Panel (LFT's)	Lt Green	Gold	2	Spin within 2 hours
Electrolytes (Lytes)	Lt Green	Gold	1	Spin within 2 hours
Magnesium Level	Lt Green	Gold	1	Spin within 1 hour (ONE HOUR)
Osmolality	Lt Green	Gold	1	Spin within 2 hours
Phenobarbital Level	Lt Green	Gold	1	Spin within 2 hours Indicate last dose

Test Name	Preferred Tube	Also Accept.	Min. Vol (mL)	Preferred tube handling instructions All refrigerated except where noted
Phenytoin Level (Dilantin)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Phosphorus Level	Lt Green	Gold	1	Spin within 2 hours
Potassium Level	Lt Green	Gold	1	Spin within 2 hours
Prealbumin	Gold	N/A	1	Spin within 2 hours
Protein Electrophoresis (SPEP)	Gold	N/A	2	Spin within 2 hours *Fasting recommended
Protein Total	Lt Green	Gold	1	Spin within 2 hours
PSA	Lt Green	Gold	2	Spin within 2 hours
PT/INR Protime	Lt Blue	N/A	N/A	Fill tube. Room Temp (ambient) unless drawn with PTT
PTH Intact	Gold	N/A	2	Spin within 2 hours
PTT/APTT	Lt Blue	N/A	N/A	Fill tube. Test within 4 hrs or spin, aliquot and freeze in 2 or 3 tubes.
Retic Count	Lavender	N/A	0.5	
Syphilis IgG	Gold	N/A	1	Spin within 2 hours
Sed Rate	Lavender	N/A	0.5	Testing must occur in 6 hrs if not refrigerated
Sodium Level	Lt Green	Gold	1	Spin within 2 hours
Theophylline Level	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Tobramycin Level	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Transferrin	Lt Green	Gold	1	Spin within 2 hours
Triglycerides	Lt Green	Gold	1	Spin within 2 hours *Fasting recommended
Troponin T	Lt Green	N/A	2	Spin within 2 hours
TSH	Lt Green	Gold	3	Spin within 2 hours
Type and Screen	Pink	Lav	2	Follow required guidelines
Urea Nitrogen (BUN)	Lt Green	Gold	1	Spin within 2 hours
Uric Acid	Lt Green	Gold	1	Spin within 2 hours
Valproic Acid (Depakote)	Lt Green	Gold	1	Spin within 2 hours Indicate last dose
Vancomycin Level	Red	N/A	1	Spin within 2 hours Indicate last dose
Vitamin B12 Level	Gold	N/A	2	Spin within 2 hours *Fasting recommended
Vitamin D	Gold	Red	2	Spin within 2 hours
Zinc	Royal Blue	N/A	2	Separate serum and RBCs ASAP. Royal Blue tube has red stripe label.

Lt Green = Mint Green Top, Lithium Heparin Gel - For best specimen integrity, these tubes should be spun within 2 hours of collection

Gold = Gold Top, Serum Separator - SST Gel - Allow specimen to clot for 30 minutes and centrifuge within 2 hours of collection

Red = Red Top, No Additive

Royal Blue = Blue Top, Trace element, no additive, plastic tube with red vertical stripe on label - See catalog for collection

Tan = Tan Top, K2 EDTA - Lead Free

Pink = Pink Top, EDTA

Lavender = Lavender top, EDTA

*Fasting recommended: 8 - 12 hours. No food, drink (other than water), smoking, chewing gum, candy, cough drops, etc.

**Protect from light: Use foil wrapping or amber aliquot/pour-over tubes.
