- CAP CERTIFICATES

Updated March 2019

All Spectrum Health Laboratories (except Lakeland Hospital Labs) underwent a system-wide CAP inspection February 12 – 15th, because of this system-wide inspection some CAP certificates may seem outdated. New Certificates may take weeks or months to arrive.

Per CAP:

“Accreditation is a continual process. A laboratory/facility will remain accredited until otherwise notified. Accreditation does not necessarily terminate on the date of the accreditation certificate. Should you need further documentation of your laboratory’s accreditation status, please email accred@cap.org.”
