Important Notes

Timed draws are drawn at the time ordered. Routine labs are drawn at the next routine draw time (i.e. the "box" above)

Once a day labs are drawn at the "next" morning draw time (might be the next day)

Example: If an AM order is placed AFTER that unit's first AM draw time (e.g. 0400 for PICU) and the collect time is the current time, that AM order will be scheduled for the next day
