Correct Specimen Labeling - Surgical Pathology

Non-Op Time

*All specimens must be labeled at patient’s side after proper identification
*All specimens must be labeled with the Beaker label
*Site/source of specimen must be hand written on label
  • Specimens with multiple tests, place any additional Beaker labels into specimen bag and send with specimen
    - For sites creating packing lists: Make sure to scan all labels to packing list
  • Match EPIC order sequence (A.B.C) to label sequence and container sequence (A,B,C) if applicable
  • Handwritten date/time / initials no longer required
