ANA screen cascade

- Cyclic Citrullinated Peptide Antibody IgG (CCPA)
- Antinuclear Antibody IgG (ANA)
  - Positive
    - Double Stranded DNA IgG (DNADS)
    - Anti-Smith Antibody IgG (SMA)
    - Chromatin Antibody IgG (CNAB)
    - Ribonuclear Protein Antibody IgG (RNPA)
    - Smith/Ribonuclear Protein antibody IgG (SRNP)
  - Negative
    - If any of the above tests are positive then no further testing.
- Sjorgen’s Syndrome A Antibody IgG (SSAB)
- Sjorgen’s Syndrome B Antibody IgG (SSB)
- Scl 70 Antibody IgG (SC70)
- Jo 1 Antibody IgG (JO1)
  - Negative
    - If any of the above tests are positive then no further testing.
- Centromere Antibody (ACM)
- Ribosome P Antibody IgG (RBA)
  - Negative
    - If any of the above tests are positive then no further testing.
