New Test Implementation

Test Name: Urine drug screen with confirmation

Implementation Date: August 21, 2018

In order to ensure timely confirmatory testing on positive urine drug screens in the appropriate clinical setting, URINE DRUG SCREEN WITH CONFIRMATION has been built. For clinical situations (e.g. obstetrical) requiring confirmation of a positive screen by definitive method the UDS WITH CONFIRMATION automatically reflexes to reference laboratory for confirmation by mass spectrometry.

The in-house urine drug screen (UDS) currently performed at BMC and JMC by enzyme immunoassay remains the same with qualitative detection of the following: PCP, Methadone, Benzodiazepines, Cocaine, Amphetamines, Marijuana, Opiates, Oxycodone, Barbiturates and Tricyclic Antidepressants.

Following implementation, UDS NO CONFIRMATION will remain orderable and is a cost-effective screen that will NOT be reflexed to reference lab for confirmation.

Test Name	Order Code	Reflex Confirmation
UDS, No Confirmation	EASTLAB304838	No
UDS, With Confirmation	LAB1231000	Yes

*If you have any questions call BMC at 304-264-1212, option #7 or JMC at 304-728-1759
