Northwell Health Laboratories

The Northwell Health Laboratories is a full service integrated health system based laboratory network, the largest in the region. It is comprised of a centralized core laboratory and over 60 hospital and outpatient locations. Northwell Health Laboratories perform more than 25 million tests per year and serves the entire New York Metropolitan area. Our laboratory provides a variety of services including home phlebotomy, lab collection centers, reference testing, and consultative and informatics services. These services are provided to patients, physician practices, hospitals, insurance companies, nursing homes, other laboratories and the diagnostic industry. In addition to general testing, the laboratory performs specialized testing in complex microbiology, endocrinology, cytogenetics, molecular genetics, cytology, hematology, immunology, special coagulation, and diagnostic surgical pathology. Northwell Health Laboratories’ integrated health delivery model allows for continuity of care across the healthcare continuum making our laboratory network a valuable partner to providers, insurance companies, and most importantly the populations we serve.

Medical School
Northwell Health Laboratories serves as a clinical campus for the Hofstra Northwell School of Medicine, which is owned by the health system in a partnership with Hofstra University.

Achievements
Northwell Health Laboratories and NYC Health and Hospitals are working together to coordinate consolidated laboratory testing services across both systems. Northwell Health Laboratories coordinates lab service optimization with hospitals that have recently joined the Northwell system, including Northern Westchester Hospital, Phelps Memorial Hospital and Peconic Bay Medical Center as well as our partners outside the Northwell system, such as Maimonides Medical Center and St. John’s Episcopal Hospital.

Our reputation for excellence in quality management and regulatory compliance has led to frequent consulting invitations both within and outside our geographic region

- Largest Health system-based laboratory in the region
- Heavily invested in a Laboratory Information Management and Pathology Informatics system
- Industry-leading expertise dedicated to maximally leveraging lab data to improve healthcare delivery
- Enhance operations by developing tools to quickly identify gaps in patient care and early signs of disease in at-risk patients
- Development of new reports that help clinicians optimize lab test utilization and excel in physician quality reporting initiatives

Economic Impact
- More than 1050 employees
- More than 160 physicians

Education and Training
- 50 clinical laboratory scientists
- 16 pathology residents
- 4 pathology fellows

2015 Operating Statistics
- 10,946,779 tests performed
- 25 patient service centers
- 17% growth rate in outreach test volume
Services
- Anatomic Pathology
- Bio Analytical Research Corporation Clinical Trials
- Cytogenetics and Molecular Pathology
- Cytopathology
- General Laboratory Medicine
- Hematopathology
- Infectious Disease Diagnostics
- Near Patient Testing
- Surgical Pathology
- Transfusion Medicine

Clinical Affiliations
- City University of New York at Staten Island University
- City University of New York at York College
- Long Island University - CW Post
- Nassau Community College
- St. John's University
- State University of New York at Farmingdale
- State University of New York at Stony Brook
